Professional Summary

Driven professional with a B.S. in Computer Science and Mathematics from Villanova University. Currently serving as an Assistant Technology Coordinator with Ringwood Board of Education, where I am known for providing proactive, hands-on support to faculty and staff to resolve complex technical hurdles. I blend a strong academic background in machine learning and quantum computing with practical experience to drive impactful technical solutions for faculty, staff, and students alike.

Professional Experience

Ringwood Board of Education- *Technology Coordinator Assistant* **January 2026 – Present**

- Manage district-wide hardware lifecycle, including end-to-end Windows 11 deployment, BIOS optimization, and driver management.
- Maintain physical security and access control via ISONAS and utilize IncidentIQ to track, prioritize, and resolve technical issues for faculty and staff, ensuring documented solutions and hardware management.
- Perform advanced component-level repairs on Chromebooks (LCDs, keyboards, batteries) and harvest parts from end-of-life units to reduce district costs.
- Support campus connectivity by maintaining MDF/IDF frames and managing rack-level cabling
- Manage school district website via CMS and implement UI improvements.

New Jersey Manufacturers- *Treasury Intern* **Summer 2024**

- Assisted in daily cash flow management.
- Monitored daily bank account balances; provided daily and quarterly projections.
- Created and presented a group research project on NJM's commercial lines products.

Revature- *Student* **Summer 2025**

- Pre-training program focused on software development, programming concepts, and industry practices.

Dairy Queen- *Shift Manager* **April 2016 - Present**

- Direct staff, maintain store operations, and ensure customer satisfaction.

Education

Villanova University | College of Liberal Arts and Sciences **May 2025**

Bachelor of Science in Mathematics and Computer Science - GPA: 3.69/4.00 (Dean's List: All Semesters)

Computer Science Senior Project- *Training AI to Play the Snake Game*

- Designed and implemented a reinforcement learning agent to play the Snake game using Python.
- Trained the agent using Q-learning and a reward-based system to optimize gameplay strategy.

Mathematics Senior Project- *Overview of Quantum Computing*

- Researched and co-authored paper on qubits, superposition, entanglement, and quantum algorithms.

Technical Skills

- Languages, WebDev, & Systems: Java, Python, React, HTML, CSS, Windows 11, ChromeOS
- Data & Algorithms: Data structures, Algorithmic design, Basic machine learning concepts
- Infrastructure & Networking: Active Directory/User Permissions, Ethernet/Cabling, BIOS configuration
- Hardware & Tools: Chromebook/Smartboard repair, Printer administration, CMS management

Personal Interests and Achievements

- **The Marine Corps Marathon (October 2025), The Jersey City Marathon (April 2026), C'mon Armageddon 50K Ultramarathon (May 2026)**
- **Content Creation-** Filming, editing, and posting short form content on popular social media platforms, documenting my journey as an endurance athlete. Centered around setting goals, working towards them every day, and maintaining a positive outlook.
- **Ultra-Marathons/Triathlons-** Currently in the pursuit of training for various endurance races.
